

MAKE IT EASIER TO LEARN AND UNDERSTAND

Promotes independent reading and learning for any student suffering from reading difficulties such as dyslexia.

Scan text to have words read aloud with natural speaking voices and defined with highest tier dictionaries instantly. ReaderPen also features a voice recorder and supports storing scanned text. Everything is built-in, and there is no need or requirement for an internet connection.

The digital highlighter – alongside the text-to-speech function – supports multi-sensory learning and aid language retention. You can use the included voice recorder to support learner revisions, and students can record pronunciations or objectives from teachers to develop independent learning.

ReaderPen features

- Reads text out aloud in English, Spanish and French.
- Multiple built-in word definition dictionaries.
- Scans and stores text internally as well as scans to a computer (no software required).
- A voice recorder for memos and to develop vocabulary and pronunciation.
- 3GB user space to store text and audio.
- Speaker and earphone jack.
- Rechargeable battery.

Scanning pens are essentially digital highlighter or mark-up pens. But takes you one step further. A scanning pen digitizes the printed information and allows it to be processed further which makes it possible to use for multiple purposes. The ones important to us are productivity and learning.
