

SMART TIPS ON USING YOUR C-PEN

Using your C-Pen is relatively straightforward. But there are some valuable tips and tricks you can use to make it even more versatile and productive.

READING SINGLE WORDS

Text Reader /Scan mode: [Append | Replace]
If you mainly read single words: set it to Replace. It keeps the screen cleaner and makes it easier to find and act on the selected word (read it repeatedly).

READING WHOLE SENTENCES

Text Reader /Scan mode: [Append | Replace]
If you mainly read entire sentences: set to Append to build on text line by line. Use the nav buttons to position the cursor at the top and press OK to read the entire text. It is also recommended that in this mode, you set Auto Read to OFF so that you can calmly scan line after line without the reading of the last line starting automatically

DIFFICULTY UNDERSTANDING A WORD EVEN AFTER HAVING IT READ ALOUD

Highlight the word, press Menu, and choose to look up the word's definition in the built-in dictionary.

READ A WORD OUT REPEATEDLY

In Text Reader, use the nav buttons to highlight the word - press and hold the OK button to zoom in on the word and have it read aloud.

SAVE AND BACK UP YOUR TEXT FILES

Connect the C-Pen to a computer in U-disk mode. Download and run the Connect Desktop app on your computer. Import files from the C-Pen to the app or export from the app to the C-Pen.

BECOME MORE PRODUCTIVE

Set the Reading speed to a higher value for faster reading. (Note that only C-Pen Reader 2 and C-Pen Exam Reader 2 support extra fast reading.)

REPEAT AND PRACTICE DIFFICULT WORDS

With the Practice function, you can repeat these more complex words, see them and try to decipher them, have them read aloud, and have their definition read aloud. The practice function only repeats words that have been zoomed in on or that have been looked up in a dictionary.

I NEED HELP KEEPING UP WHEN A WORD'S DEFINITION IS READ ALOUD IN THE DICTIONARY FEATURE

Search for the word to get its definition. Press and hold the DOWN button approx. one second until the first definition of the word appears on the screen. Press OK to read the definition aloud - it can be done repeatedly. Press and hold the DOWN button again to advance to the following definition. Press and hold UP to return to the previous definition, or press BACK to exit.
