CREATE A SAFE AND INCLUSIVE CLASSROOM WITH A SCANNING PEN –
5 SIGNIFICANT BENEFITS

A scanning pen can help establish a safe and inclusive classroom where all students feel appreciated and valued. Discover the five most significant benefits of a scanning pen.

EVERY STUDENT CAN PARTICIPATE IN REGULAR EDUCATION

With a scanning pen, all students, regardless of their reading disabilities, can be a part of regular education. The scanning pen lets students who have trouble reading scan words they don't understand, and the pen reads them aloud. With the help of the pen, the student can now participate in traditional education with the other students.

EVERY STUDENT CAN WORK INDEPENDENTLY

One of the pen's most appreciated features is the ability to change the reading speed. The students can individually set the reading speed pace. This feature allows the student to follow the reading in peace without being limited to one rate. The student can now read at their own pace without aligning with others.

LESS ISOLATION AND ANXIETY IN THE CLASSROOM

A student with reading disabilities like dyslexia often feels isolated or left out in the school since their reading isn't on the same level as the other students. With the help of a scanning pen, anxiety can be reduced since the students now have an alternative method for reading, which feels less stressful and more manageable. They simply feel more included and involved.

NO NEED FOR CHARGING BREAKS

The slim and compact design of the pen makes it easy to carry and bring around. Although the pen is small, it has a long battery life and can be used a full work-day without charging. The long battery time means the student can use the pen during many school days without worrying about charging. The lightweight also makes the pen easy to bring between classes.

A DIGITAL TEACHER

By remembering which words are frequently scanned, the pen can register what words the student struggles with and present them in a word list. The word list can be displayed on the pen's display or on a computer to which the pen can be connected. The word list allows the student to practice the words independently in school and at home. The pen works as a personal teacher that informs the student on what terms to focus on.

EMPOWERING PEOPLE

C-Pen is the original high-quality state-of-the-art pen scanner. Founded in 1998 in Lund, Sweden, we develop and manufacture industry-leading scanning solutions that make it easy to process printed text, empowering people's ability to read, understand and learn.
